

Filtermist Ultra™

A Complete Mist Collection System Designed to Handle Virtually All Machines and Applications

NEW

Driven by our powerful FX-1200 Filtermist to handle a wide range of machine tool types and sizes

Easy Installation – unit is mounted to a self-contained mobile cart and includes 20 feet of 6" diameter ducting

An integral cyclone aids in particle separation and greatly reduces maintenance requirements

Compact footprint (19"x20") enables convenient locating behind chip conveyor on most machines

Great for:

- Turning
- Milling
- Grinding
- Coolant Pressure up to 1500 psi
- Cast-Iron Machining

Heavy-duty 3-phase motor

Simple one-SKU ordering

Intake elbow positioned to ensure maximum airflow and minimize risk of pooling

Dual discharge ports support continuous drainage back to the machine tool coolant sump

Heavy-duty locking casters for secure positioning.

Filtermist Ultra™

- The Filtermist Ultra™ is a comprehensive mist collection system that handles virtually all applications.
- Unit is pre-mounted to a compact mobile cart, eliminating the need for any additional stands or brackets.
- Simple ordering – one part number takes care of everything.
- For use on any machine with an internal volume greater than 60 cu. ft.
- Integral cyclone acts as a pre-filter to remove dust, fines, and large droplets, greatly improving overall performance and minimizing maintenance.
- Optional after filter.
